about

I am a specialized Front End Developer with expertise in React and CSS. My passion lies in creating amazing UI designs, leveraging responsive design, animations, and CSS-in-JS to make web pages look and feel like native applications. I strive to create a user-friendly web UI that is intuitive and easy to navigate.

I am also invested in optimizing workflows and leveraging automation to make ways of working more agile and efficient. I am a strong advocate of Continuous Integration/Continuous Deployment (CI/CD) and enjoy using the latest tools and technologies to streamline processes and make everyone's lives easier. Staying up-to-date with the latest front-end trends and technologies is also a priority for me, and I am particularly interested in Optimistic UI, SSR/SSG, GraphQL, NextJS, and TypeScript.

skills

HTML

HTML5, Semantic, Accessibility, ARIA, Responsive Web Design

CSS

CSS3, Sass, BEM, OOCSS, SMACSS, Flexbox, CSS Grid, PostCSS, Bootstrap, Foundation, Tailwind

JavaScript

ES6, TypeScript, jQuery, GraphQL, Unit Testing, Jest, E2E Testing, Playwright, Cypress, Puppeteer, MSW

React

Redux, Redux Toolkit, Redux Thunk, Gatsby, Nextjs, React Query, Apollo Client, Urql, Reselect, React Router, Reach Router, Emotion, Styled Components, React Testing Library, Framer Motion, React Pose, React Spring, Storybook

Tools

GIT, CircleCI, AWS, Netlify, Vercel, Webpack, Parcel, ESLint, Prettier, Grunt, Gulp, Sketch, Figma, Zeplin, Adobe Photoshop, Adobe XD, Adobe Target, Google Analytics

Misc

UI Design, UX Design, Wireframing, Agile, Scrum, Kanban, TDD, BDD, A/B Testing, CI/CD

work experience

03/2023
Currently

Senior Front End Engineer

Contract

at [E.On Next](#) - London (UK)

Collaborated effectively within the Front End team to deliver impactful solutions that elevated both user experience and developer productivity. Notable achievements encompass:

- Devised and executed a novel incentive campaign aimed at boosting client engagement and soliciting valuable feedback on energy meter data.
- Successfully led the implementation of the appointment rebook feature, enhancing user convenience and streamlining the booking process.
- Collaborated closely with the technical team to enhance the utilization of the headless CMS, contributing to improved content management workflows and system efficiency.

06/2021
03/2023

Senior Front End Engineer

Full-time

at [Tray.io](#) - London (UK)

As a member of the Content Engineering squad, I contributed to the development of the Marketing, Documentation, and Academy websites. My recent accomplishments include:

- Fully refactored a website using the latest technologies such as TypeScript and improved the testing suite, resulting in improved code quality, maintainability, and scalability.
- Successfully refactored another project from Gatsby to Next.js for improved performance and scalability.
- Migrated a project from local MDX files to Contentful, streamlining the content management process.
- Implemented E2E testing to ensure optimal website functionality and user experience.
- Upgraded our CI/CD pipelines and migrated them to Github Actions for more efficient and effective development workflows.

As a senior team member, I also play a key role in the front-end guild and participate in the interview process for new hires.

12/2020
03/2021

Senior Front End Engineer

Full-time

at [Babylon Health](#) - London (UK)

Working within the Appointments squad to develop and improve the user booking web flow and the appointment management service tool.

As part of the wider technical team I collaborate to move forward the technical stack, improve the pipeline, increase automated processes and overall help create a better developer experience.

10/2019
12/2020

Senior Software Engineer

Full-time

at [Sainsbury's](#) - London (UK)

As Front End Tech Lead of one of the teams in the marketing family, I'm responsible for shaping the direction of the Front End architecture of the products from inception to delivery with particular attention to the React landscape. My target is to improve the performance of the sites, reduce error rates and boost accessibility; with particular focus on tooling to increase automation and the developer experience in order to deliver more, faster and safer.

As part of the leadership team of the family, I'm heavily involved with the interview process and the family's community of practices, where I'm really active by collaborating, sharing and reaching out to other colleagues and teams.
